

## DART Automates Landing Gear!

Deploy and Retract Technology

# Operating landing gear is now as easy as flipping a switch.

## DART™ Landing Gear Automation

DART is AIRman Products' new **Deploy And Retract Technology**, a motorized landing gear that is designed to cost-effectively replace manual crank landing gear and improve productivity. DART will revolutionize the way fleets handle their trailer drops and hooks.

Gone are the days of using a hand crank to drop or retrieve trailers multiple times a day in all kinds of nasty conditions. Gone, too, are potential worker's compensation claims and lost time due to injuries.

DART is also a huge differentiator for your fleet in attracting drivers and yard staff, giving you an edge in a highly competitive labor market. DART is easy to use and requires little training. Plus, drivers love it!

## TERRIFIC BENEFITS TO FLEETS AND DRIVERS:

### Driver Benefits

- > DART raises and lowers landing gear with a flip of a switch
- > DART eliminates driver fatigue
- > DART reduces risk of injury in hot, wet or slippery conditions
- > DART promotes driver satisfaction

### Fleet Owner Benefits

- > DART gives you an edge attracting and retaining drivers
- > DART reduces workers compensation claims
- > DART saves time
- > DART literally pays for itself
- > DART installs in < 2 hours

# Fast, easy installation.

With DART, there aren't many parts. This translates to simple, fast installation. In fact, it's designed to install in under two hours!

Simple, intuitive instructions and an accompanying video are provided to streamline the entire process.

**INSTALLS  
IN UNDER  
2 HOURS!**

- > A snap to install
- > Simple operation
- > Full installation kit included with DART

## HERE'S WHAT DART CUSTOMERS HAVE TO SAY:

*"I love using the DART system! It doesn't require any effort and it's very convenient. All I have to do is push a button".*

Fleet Driver

*"What I really like about DART is that it's very easy to use and it doesn't need any maintenance. The drivers like it a lot, too".*

Fleet Maintenance Manager
